»**ORGANOID® PURE** is produced without carrier materials, as a pure and irregular layer. These coatings are custom-made – raw materials can be freely selected according to colour and origin requirements. The translucency can be defined according to customers wishes by the quality of fibres and the coating thickness. No stock, delivery on demand.

The organoid® coatings are allergy certified, ecologically harmless, free of health risks, climate regulating and produced in Austria on a CO2-neutral basis.“«
