

- 2-layer Alpine Hay edge band
total thickness: 1.85-2.15 mm
(0.55 mm oak backing included)
- widths: 24 mm, 34 mm
- roll length: 50 m
- processing same as standard edge bands with common hotmelt adhesives or PVAc-dispersion
- variable chemical resistance depending on surface finishing
- other surfaces and backings, lengths and widths available on request (minimum quantity 60m²)

*slightly fragrant

WILDSPITZE*

ALPINE HAY, hand-cut from an altitude of 1,700m above sea level, grown on the hillsides of the Wildspitze, the highest mountain in Tirol.

»Natural, slightly fragrant alpine hay as edge band offers many innovative design possibilities and is suitable for edge banding machine processing.

The organoid® coating is allergy certified, ecologically harmless, free of health risks, climate regulating and produced in Austria on a CO₂-neutral basis.“
