

PRESS RELEASE

Tyrol, May 2025

A Fusion of Colour and Function – Organoid[®] unveils new natural surfaces and updated acoustic product line

New designs, an updated product range, and a clear mission: bringing more nature into everyday life.

In 2025, Organoid[®] expands its collection with **six brand-new natural surfaces** that are more vibrant, colourful and floral than ever before. Radiant blossoms, tropical leaves and delicate natural materials meet innovative design – a feast for the senses and a statement for interiors with character.

The new highlights:

- **JUNGLE KING**
A bold statement with lush green tropical leaves – perfect for those who love nature with power and presence.
- **SUPERBLOOM**
A vibrant sea of blossoms bursting with colour and joy, bringing any space beautifully into bloom.
- **VIOLETTE**
Soft lavender and violet hues create a calming atmosphere with a touch of floral elegance.
- **ROSY EVERLASTING**
Gentle pink tones and a fluffy texture give this surface a dreamy, airy feel – like a breath of spring indoors.
- **TROPICAL HEART**
Exotic, lively, and full of surprises – a tropical blend with natural depth and fresh energy.
- **COLOUR SPLASH**
Bold, bright, and playful – this surface brings a splash of colour, childlike joy, and creative energy into any interior.

Alongside the colourful additions to the existing **Natural Surfaces** collection, the product line **Organoid[®] Natural Acoustics** experiences an update. These elegant acoustic elements combine effective sound absorption with authentic natural materials, creating spaces that are not only beautiful, but tangibly quieter and more grounded in nature.
