

## ORGANOID® ACOUSTIC PICTURE ALPINE MEADOW light

Our acoustic pictures combine highly effective sound absorption (absorber class A) with the natural look of real alpine meadow grasses and flowers. The easy-care picture absorber is available in two sizes and with two elegant wood frame colours, allowing it to adapt flexibly to any room design. The core made of **sustainable wood fibres** ensures an optimum acoustic effect – ideal for offices, living rooms or hotels.

The surface made of our popular natural surface **ALPINE MEADOW light** brings alpine lightness and naturalness to the wall – for a noticeably calmer and visually appealing room climate.

### Natural surface

**ALPINE MEADOW light** consisting of hand-cut Tyrolean Alpine hay with colourful petals of heather, cornflowers, sunflowers, lavender, roses and approx. 5 daisies per m<sup>2</sup> in light application thickness on breathable flax fleece on acoustic picture absorber.

### Mounting

- **Determine position:** Think about where you want the picture to hang. Use a tape measure to mark the ideal centre point at eye level (approx. 150-160 cm from the floor).
- **Make a mark:** Measure the back of the frame (e.g. distance between the hangers). Transfer these measurements to the wall and align with a spirit level.
- **Drill holes:** Use suitable wall plugs and screws according to the condition of the wall. Drill holes at the marked points.
- **Insert dowels and hooks:** Insert wall plugs into the holes and screw in screws/hooks so that the picture hangs securely later.
- **Hang up the picture:** Hang up the picture and align with the spirit level – done!
